##### 5001200 - Nexus 200 - External Bin Housing

Nexus 200 is a twin-liner litter bin with a slimline, elliptical shape which takes up minimal space on the pavement. The apertures are visible from all angles. A large 200-litre capacity reduces the need for frequent emptying. Its attractive curved hood prevents litter being left on top of the bin and stops rainwater from pooling on the unit.

Nexus 200 Bin features an innovative door & lock design that makes emptying the unit quick and simple. A single operation is enough to access both liners. The doors feature concealed hinges, and interlock with the container at three points for maximum strength and security.

Recycling bin variants can also be supplied with recycling panels and graphics.

The Nexus 200 is available in a number of configurations:

- General Waste Housing
- Plastic Bottle/Can Recycling Housing
- Can/Newspaper & Magazine Recycling Housing
- General Waste/Mixed Recyclables Recycling Housing
- Mixed Glass/Newspaper & Magazine Recycling Housing
- Plastic Bottle/Mixed Glass Recycling Housing

##### 5001360 - Nexus 360 - External Bin Housing

Nexus 360 combines contemporary style with robust construction and is designed to co-ordinate with the Nexus 200. Nexus 360 Bin houses a 240-litre or 360-litre wheelie bin. The curved design of the Nexus 360 prevents litter being piled on top, and the integrally-moulded ridges deter flyposting. An overhanging aperture shelf ensures that all recyclable material ends up in the wheelie bin and not on the floor of the housing.

Nexus 360's door is extremely tough, with a 5-point interlocking slam-shut design that lifts up to open. The gravity-assisted closing ensures it won't be left accidentally unlocked. The body of the bin features a smooth base ramp to ease the wheelie bin in and out, and special wheel-locating grooves in the floor make sure the wheelie bin goes back in the right place every time.

Recycling bin variants can also be supplied with recycling panels and graphics.

The Nexus 360 is available in a number of configurations:

- General Waste Housing
- Can Recycling Housing
- Plastic Bottle Recycling Housing
- Mixed Glass Recycling Housing
- Newspaper & Magazine Recycling Housing
- Mixed Recyclables Recycling Housing

##### 5001440 - Grampian - External Bin Housing

Grampian is a large-capacity housing with flexible liner options. Grampian Housings can be supplied with a choice of five liners: 120ltr or 140ltr wheeled bins, a pair of 65ltr steel liners, two 90ltr polyethylene liners, or a 240ltr sack retention system.

Grampian Housings are extremely robust, with a strong knuckle-hinge door and stainless steel lock components. Ground fixings are included to secure the bin to either an existing concrete foundation or suitable paving slabs.

Recycling bin variants can also be supplied with recycling panels and graphics.

The Grampian is available in a number of configurations:

- General Waste Housing
- Can Recycling Housing
- Plastic Bottle Recycling Housing
- Newspaper & Magazine Recycling Housing
- Clear Glass Recycling Housing
- Mixed Glass Recycling Housing

##### 5001770 - Modus 770 - External Bin Housing

Modus is a high capacity bin housing, which securely contains a wheeled bin in a tidy manner. Covering large wheeled bins with a Modus Housing increases recycling rates and improves the appearance of the area. The Modus range of housings accepts a wide range of standard-sized 4-wheeled containers. Modus 770 is designed to accept 600, 660 or 770-litre containers.

A hooded peak helps to protect the aperture from the elements. The Vandalex® frame provides exceptional strength and weather resistance. The Modus Housing features a base skirting to keep pests out and conceal the door wheel, which is adjustable to ensure easy opening of the housing. A stainless steel hinge provides strength and security. Modus Housing features Ecoboard™ panels, an extremely strong, 100% recycled material made from recycled wheelie bins and polyethylene carrier bags. The material will not chip or rust and never needs painting. Recycling bin variants can also be supplied with recycling panels and graphics.

The Modus 770 is available in a number of configurations:

- General Waste Housing
- Can Recycling Housing
- Plastic Bottle Recycling Housing
- Newspaper & Magazine Recycling Housing
- Mixed Glass Recycling Housing
- Mixed Recyclables Recycling Housing
- Food Waste Recycling Housing
