### DESIGN AND BUILD WITH ROOCYCLE WPC

- Roocycle ET and Roocycle Enviro are WPC (wood/plastic composites).
- Roocycle WPC extrusions are suitable for all construction projects.
- Structural Engineer Certification is available - bridges, boardwalks, viewing platforms & stages.
- Estimated life cycle is 80 -100 years. WPC's are 100% roocycleable.
- Profiles are extruded in common shapes, dimensions and lengths.
- Profiles have rounded corners, no splinters and a long life surface.
- Australian recycle material is used for Roocycle ET raw profiles.
- UV stabilised to ensure a longer lasting look for your project.
- Termite and white ant resistant
- Thermally stable, will not freeze, low expansion <1%
- SLIP TESTED to ASA/NZS 4586:2004. for W and V classifications
- Use traditional woodworking tools to dress, cut, drill, plane and rout
- Environmental benefits
- 98% recycled materials are used
- Each kilogram of product diverts 0.98 kilograms of waste from landfill.
- Profiles are non toxic, will not leach into the environment.
- Other services
- Stocking reduces transportation cost and packing waste.
- Project lengths are available with a leadtime.
- Painting service is available
- Dressing service is available "Roocycle ET grey"
- Furniture manufacture service is available
- MSDS is available with all purchases.
