## ROOCYCLE EW

Moodie RoocycleEW recycled plastic profiles are extruded in a plant in Australia using Australian materials. Moodie Roocycle EW recycled plastic ewaste is collected via Planet Arch cartridge recovery processed by Close the Loop. Close the Loop recycles all the components such as steel, ink, toner and the ABS style plastics. The ABS style plastics are chipped into small pieces, cleaned of metals by magnets. The particles are melted, degased and vacuum forced throu a dye to the desired shape. RoocycleEW is formed from engineered grade polymers, the stability and strength of this mixture allows us to use.

### Design & Build with Roocycle EW

- Profiles extruded in common shapes dimensions & lengths.
- Profiles have rounded corners, no splinters and a long surface life.
- 100% Australian recycled material is used for Roocycle EW raw profiles.
- Termite & White Ant resistant.
- Use traditional woodworking tools to dress, cut, drill, plane and rout.
- Environmental benefits
- No significant hazardous or noxious compounds are evolved/leached.
- Can be painted and glued.
- Furniture manufacture service is available.
