BEACH ACCESS

The Roocycle range of materials are perfect for use in Beach Access applications. Roocycle materials can be direct buried into the sandy environment as the moisture will no affect the material.

MARINE ENVIRONMENTS

The Roocycle range of materials are ideal for use in Marine Environments as the Roocycle Material does not permeate water. Perfect for Viewing Platforms and Boat Ramps.

72870 - VIEWING PLATFORM

72333 - BOAT RAMP

PERMEABLE GROUND COVER

Roocycle Permeable Pavers are also available. These allow rain water to be absorbed into the ground and are ideal for areas where water runoff can be an issue.
