SIZES

Cantaport shelters are available in a number of sizes. The 2 most common sizes being:

- 5.1m x 3m
- 5.8m x 3m

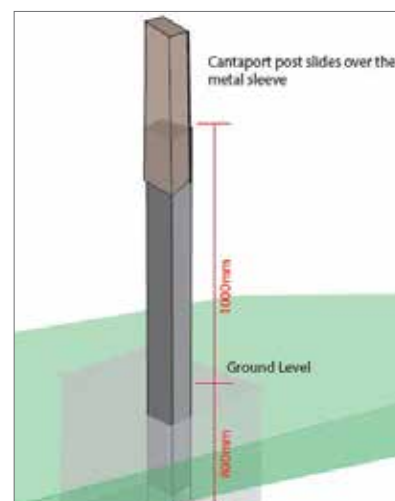

To find out about the other sizes available please contact us as they are special order items.

INSTALLATION

The Cantaport shelters are installed with inground sleeves to provide added strength to the structure.

The sleeves are hot dip galvanised.

The sleeves are 1.8m long and are installed 800mm into the ground leaving 1m exposed. The Cantaport post then slides over the top of the metal sleeve and is fixed to it.

POST COLOUR OPTIONS

Cantaport posts are available in the following anodised colours.

SILVER

URBAN GREY

BLACK

BRONZE

ROOF COLOUR

The recommended roof sheeting for Australian conditions is the Polycarbonate sheeting in Blue Smoke colour as shown below.

The polycarbonate roofing reduces heat by 75% and blocks out 99% UV rays. It is 250 times stronger than glass and is hail resistant.

BLUE SMOKE ROOF SHEETING
