

Wilshire Screen

Planter + Trellis = Screen!

Combine our Wilshire Collection rectangular planters and VertiGreen modular 3D trellis to create attractive, easy-to-install solutions for screening off unsightly views or providing privacy. Available in a range of sizes, colors, and trellis sizes, the Wilshire Screen lives up to the commercial quality standard Tournesol Siteworks is known for.

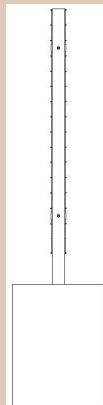

- Commercial-quality lightweight FRP fiberglass planters in nine sizes, dozens of finishes
- VertiGreen 3D trellis supports optimal plant growth - in either 3" or 6" grid size
- Integrated brackets anchor into wall - fast, simple and attractive installation
- Available with Tournesol Siteworks' industry-leading self-watering container irrigation

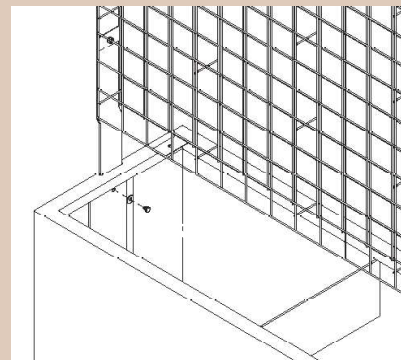

Typical offset
bracket position

The trellis panel may be positioned either centered, or to one side of the planter (offset) depending upon the application.

The panel is attached to the brackets at two points using hardware provided, using the joiner brackets manufactured on either side of the trellis.

Typical centered
bracket position

Wilshire Screen brackets insert through a slot in the planter, and are attached from the inside using stainless steel fasteners (included).

Wilshire Screen
