

# Thea Foss Collection

The Thea Foss bench was designed as a solution to allow visitors on the Thea Foss waterway esplanade to see Tacoma's Museum of Glass or the scenic Thea Foss waterway in Tacoma, WA. This reversible back bench is great for public places that have points of interest on both sides. This unique, movable back bench allows the user to face either direction by simply moving the back of the bench.

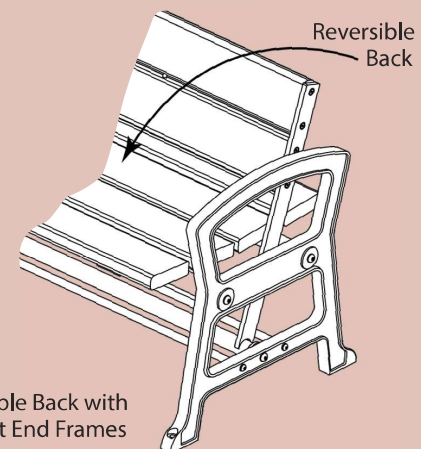

- Ductile Cast Iron end frames
- Available in Boulevard™ FSC® wood. Non FSC-rated wood options include Ipe, Douglas Fir, Red Cedar and recycled plastic lumber
- Easy reversible back for viewing on both sides of the bench
- Thea Foss Collection benches are available as surface mount or freestanding

Boulevard™ Thermally-Modified North American Hardwoods.

We take FSC® certified hardwoods harvested domestically (typically ash), then treat it at high temperatures and with steam in special kilns. This natural process changes the chemical make-up of the wood, creating a dark colored lumber with the rot, pest, and decay prevention characteristics of most South American hardwoods.

The Thermal-Modification process is easy on the environment, reducing the harvesting and transport of old, slow-growing trees.
