

GroundART

Thermoplastic markings for concrete or asphalt
Set your mark for 30 years

GroundART or Art on the ground

offers educational games and imaginative play for the outdoors.

LINE Games have existed for many years, many designs are new but all are destined for primary school, kindergarten, recreation centre, nursery. All new designs have evolved after a lot of research and consultation with teachers.

All our games are aimed at helping the development of young children, to pattern recognition, learning from calculation, to coordination and balance, to dexterity, imagination or social interaction. We want to feed the child's imagination and to increase the activity of the mind and body, to learn with games.

Your Designs can be created, just send your design to us for consultation and quoting. All designs are possible, the imagination has no limits.

We will work with you if you have special needs.

All our games are premade in thermoplastic resin with colours for long life.

Easy to install, our games last much longer and offer you much more than painted games.

We offer a complete service for the creation and implementation of your project, little or large.
