playtop® SAFER SURFACING WITH NIKE GRIND

Take the superior properties of Playtop Safer Surfacing, the credentials of Nike Grind, add some innovation and what do you get? A new range of coloured blends from Playtop which incorporate Nike Grind. This new range is unique – it is the next generation of impact-absorbing, wet-pour surfacing for playgrounds and walkways. And, when combined with the Playtop base layer, more than 70% of it is made from worn out sports shoes and other recycled products!

Beneath the Surface

The strong and porous base layer is made from large rubber granules manufactured from used commercial truck tyres.

The open structure of the base granules also creates a strong interlocking bond with the top layer – making it highly resistant to vandalism.

Going Further than ever

This latest range from Playtop combines the base with a top layer made from Nike Grind and other recycled materials to create a surfacing system that is more than 70% re-used materials. In addition, the structure of this unique safer surfacing system is such that the top layer now goes further.

Playtop is the only surface of its kind that uses recycled sports shoes in the form of Nike Grind.

Go Green...

...or red, blue, black, brown, sand, plum and flame. With a choice of eight colours, surfacing can still be bright, fun, inspirational and educational.

Tried & Tested

The new Playtop range of coloured blends with Nike Grind has been tested for compliance with the Nike Finished Product Restricted Substance List (RSL).

Playtop coloured blends with Nike Grind - you can have it all:

- **Sustainability**
- **Durability**
- **Affordability**
- **Exclusivity**

Due to the recycled nature of the product, the above images are representative only and the final colour may vary slightly.
