# 34112 PLAY IT SAFE PLAY SURFACES

With systems suitable for all ages, there will be a PlayItSafe system to suit all budgets and needs. Playitsafe systems are completed with MW Velour, a low maintenance, sand dressed surface that is available in a range of 14 bright colours which, thanks to our laser cutting technology, can be custom designed to create fun and educational shapes and patterns including Hopscotch and snakes.

Playitsafe offers an excellent alternative to natural grass, bark covered areas, wet pour and asphalt, providing a surface that is soft underfoot as well as being durable in any weather.

# CLIMB JUMP POP PLAY IT SAFE PLAY SURFACES

Our playground surfaces allow children to enjoy a bright, vibrant environment that's very safe to play in. A child's instinct is to climb and explore, which sometimes leads to a fall. With five levels of critical fall height and almost limitless design options, we can find the right playground surface for you.

Made from impact absorbing material, our systems cover critical falls from as low as 120cm all the way up to 300cm. The systems consist of the top surface, accompanied underneath by a foam pad to cushion the surface.

Being a sand-dressed, vandal resistant surface, Playitsafe is the cleaner, safer and more durable alternative to most other playground surface options which meets **ASA STANDARDS** and **BS EN1177** and **BS7188** standards.

MULTI-USE

# MW VELOUR

MW Velour is a sand dressed needlepunch surface designed with a random pile which benefits various ball sports that require a medium to low ball bounce.

Available in 14 different colours, MW Velour enables designs to be inset into the surface which is ideal for primary spaces to make the area bright and bold.

MW Velour can be installed directly onto tarmac or equally with a PlayitSafe shockpad to prolong the life and performance of the surface. Meets the **ASA and EN15330 Part 2** standards.
