

Columbia Cascade Company has been committed to producing eco-friendly playground equipment since its inception. All of our products and finishes are made from non-toxic materials. Our factory and offices are operated and maintained in an environmentally responsible manner.

Our Products

- All of our metal components are coated with CASPAX-7, a lead-free powder coating.
- The steel pipe used in our products contains 95-100% post-consumer recycled metal.
- We do not use lead-containing galvanized coatings on playground equipment parts that could come in contact with children's skin.

- Our plastic accessories and components contain no Polyvinyl Chloride (PVC).
- Our plastic accessories and components contain no Phthalates.
- TimberForm RePlay plastic timbers are made from 100% recycled post-consumer plastic products. This structural play system is the most environmentally friendly choice available when selecting new playground equipment.
- Our child-friendly wood preservative is not and never has been arsenic based.
- Our "playground equipment grade" Douglas fir timbers are obtained from sources that adhere to strict and ecologically sound sustained yield practices. For every tree that is felled for playground equipment use, at least three superior seedlings are planted.
- Many of our playground equipment products can help in achieving LEED® credits for your project.

Our Manufacturing Plant

- Our production facility employs strict environmental management practices.
- The dry finish CASPAX-7 powder-coating process emits no volatile solvents to the atmosphere and is ecologically sound.
- We do not allow factory emissions of any kind.
- Using energy efficient fluorescent lamps, factory lighting is motion controlled and task oriented.
- Factory storm water is diverted to on-site engineered bio-swales rather than to a stream or public sewer system.
- All production scrap (metal, wood and plastic) is recycled.
- Wooden shipping pallets are salvaged, repaired and reused.
- All new cardboard packaging is produced only from recycled paper products.

Our Design Headquarters and Offices

- Our headquarters location was selected for easy access to the expanded light-rail line in the geographical center of Portland, Oregon. We encourage our employees to commute to work via mass-transit or alternative transportation.
- The company provides on-site bicycle racks and monthly transit passes for employees. On-site showers and changing rooms are available to cyclists.
- To conserve energy and natural resources, we discontinued the industry practice of mass-mailings of paper catalogs over ten years ago. Although we still print a limited number of catalogs for hand distribution, we encourage the online downloading of PDF copies.
- All paper, plastic and metal waste is segregated and recycled. Obsolete computer equipment is delivered to authorized recyclers.

LEED is a registered trademark of the U.S. Green Building Council.

Other Columbia Cascade Products

Columbia Cascade also produces a complete line of site complements, bicycle parking solutions and outdoor fitness systems. To obtain a catalog contact your local Columbia Cascade representative or our headquarters at Portland, Oregon. All of our catalogs are available as downloadable PDF files at our web site www.timberform.com. Look for the category entitled Current Publications.

TimberForm RePlay Plastic Members are made from 100% recycled post-consumer plastic products. Recycled plastic is the environmentally friendly choice when selecting new playground equipment. TimberForm RePlay posts and beams are extruded (not molded) from recycled high density polyethylene (H.D.P.E.). The result is a dense, strong member with uniform surface texture and color throughout so maintenance issues are minimal.

TimberForm-2 Model No. 4812-TF RePlay Model No. 4812-RP

Appropriate for Children 2 to 5 Years of Age.

Play Area, Equipment Only:

14' x 21' (4.3m x 6.5m)

TimberForm Free-of-heart-center Timbers are playground equipment grade Douglas fir that is free-of-heart-center (F.O.H.C.). The F.O.H.C. specification is critically important. Timber containing the tree's heart or pith will perform poorly in time and have a short useful life.

WARNING

METAL PLAYING SURFACES CAN BECOME DANGEROUSLY HOT WHEN EXPOSED TO DIRECT SUNLIGHT. OWNERS/OPERATORS MUST WARN USERS THAT SERIOUS THERMAL BURNS MAY RESULT WHEN BARE SKIN COMES IN CONTACT WITH HOT METAL.

Arsenic-Free Wood Preservative

All wood components used on TimberForm-2 Play Areas and Accessories are pressure-preservatively treated after all fabrication is completed with a child-friendly wood preservative.

Columbia Cascade does not and has never used arsenic-based wood preservatives.

TimberForm-2 Model No. 4820-TF RePlay Model No. 4820-RP

Rotationally-molded Plastic Accessories TimberForm, RePlay and PipeLine plastic accessories are manufactured from hot-compounded medium density polyethylene (MDPE). Hot-compounding assures uniform coloration within each part and from part to part and maximum UV resistance. The final wall-thickness of our rotationally-molded plastic accessories (shown in yellow at left) is 50% thicker (both shown actual thickness) than the industry standard adding to strength, durability and long useful life. Our plastics are free of PVC and phthalates.

Community-Built TimberForm-2 & RePlay Playgrounds

Community leaders are changing the face of playgrounds everywhere and Columbia Cascade makes it easier than ever. Neighbors using home power-tools and levels can assemble most TimberForm-2 and RePlay structures in less than a day. The need for many concreted posts is dramatically reduced allowing for much simpler and quicker installation by volunteers.
