

Seesaw

Hop up and down on a set of tubes to visualise the connected vessels effect

An enlarged seesaw designed as an environmental sculpture. One or two players may hop on each side of the structure. A set of tubes filled with liquid are attached to the pendulum and during play the liquid is shifted around the tubes while constantly retaining a level parallel with the ground, illustrating the connected vessels law. In addition the seats constantly remain levelled with the ground regardless of the pendulum angle.

Specification

 Age	3+
 Accomodates	2 - 4
 Area	32.0 Sq m 344.3 Sq ft
 Overall Height	3.0 m 9.84 ft

350-SEESAW

Patent pending

 Overall Weight	350 Kg 770 lbs
 In Ground Depth*	1 m 3.28 ft
 Installation Time**	4 Hours
*Including concrete foundation	
**Not including concrete foundation	
	Crane is required

Laws of Physics

Connected vessels
Parallelogram

Alternative Energy

Kinetic Energy

Our Planet and Universe

Gravity creates the connected vessels law
Surface of the sea is identical across Earth
Gravity is equal throughout Earth
The moon's gravity contradicts earth's gravity, causing high and low tides
